

Professor James Caldwell Travel Scholarship

Application form

The Travel Scholarship aims to support Ph.D. student research by offering financial support for international research visits, excluding conferences, of 2 to 4 weeks at collaborating institutions. Applications should be made to the Director of Research for the Centre of Theoretical Atomic, Molecular and Optical Physics (CTAMOP) by completion of this form.

Ph.D. student name:

Ph.D. supervisor

Contact Details-

E-mail:

Title of project:

Place(s) to visit and duration:

Brief description of project and key objectives

Amount of support sought (please provide details, including additional support sought)

It is a key requirement of the travel scholarship that the donor is informed about the supported project. The Ph.D. student must therefore be willing to participate in publicity associated with the Travel Scholarship (e.g. write a short report for the Alumni Magazine, photocalls, etc.). It is also expected that the Travel Scholarship will be acknowledged in publications arising from the Study visit. On completion of the visit, a one-page report should be submitted to the Director of Research for CTAMOP.
